

## Current and Pending Support Instructions

All current project support should be listed, including internal funds allocated toward specific projects.

**Rule of thumb:** ALL research projects or activities requiring a portion of time of the researcher must be included, even if there is no salary support on the project(s).

### **Such research projects or activities might be funded by:**

- Federal, State, local or foreign government agencies
- Public or private foundations
- Industrial or other commercial organizations
- Internal (UT Austin) sources, such as start-up funds for new faculty hires; endowed chairs; Vice President for Research grants, Department funded awards, or other internal seed funding support

Each senior investigator's Current and Pending Support must be uploaded as a single PDF. There is also an option for each current or pending project to be manually entered for each senior investigator.

### **Proposal List Order:**

- First entry: list the grant you are applying for right now, using the title format of "[Your Title] (THIS PROPOSAL)." Label it as 'pending.'
- List all your pending proposals, in reverse chronological order (most recently awarded first).
- Then list your active grants (most recently awarded first).

### **What *Not* to Include:**

- Never list expired awards (NIH asks for these; NSF does not). Don't list proposals that were rejected, either.

### **What to Include in the Individual Form Fields:**

- Project/Proposal: Full title of project. If you are not the lead PI, name the PI in parentheses at the end of the title, like so: (PI: Dr. Theodor Geisel).
- Source of Support: The sponsor (i.e. NSF)
- Total Award Amount: Provide the total amount of money, for the entire period of the grant, that will come to your institution. This total includes direct plus indirect costs. If you're collaborating with an external entity, don't include the money the external entity received. But if you're collaborating with another UT Austin Senior Investigator, you will include the total both UT Austin Senior Investigators receive.
- Location of Project: Where (by institution) you are doing your work. You will almost always write "UT Austin."
- Person-Months: If an investigator is paid on a 12-month salary (for example, a Research Associate), use "Cal" (calendar months). If they are teaching faculty with a 9-month appointment, you can select Calendar months or Academic and Summer. If a faculty Senior Investigator receives salary from the grant during the summer, then time spent on that grant is recorded as Summer months; if they contribute time to the grant but do not receive salary for their efforts, that time is usually recorded as Academic months. Note: NSF's general policy limits [salary compensation](#) for senior personnel to no more than two months of their regular salary in any one year. This limit includes salary compensation received from ALL NSF-funded grants.
- Pagination: Remember to complete the "Page \_\_\_ of \_\_\_" blanks at the bottom of the field, for each page of the C&P

## Current and Pending Support

*The following information should be provided for each investigator and other senior personnel. Failure to provide this information may delay consideration of this proposal.*

Investigator:	Other agencies (including NSF) to which this proposal has been/will be submitted.
